

As a Glendale resident listening to K-love is 105.5 is something I need to do everyday. I can't remember the last time I have listed to another station or a CD. If K-love was forced off the air by an LPFM broadcaster millions of people would be without a positive encouraging station. There has been times in my life that K-love has played a song or ministerd to me in a way that power 92 or camel county would never be able to do. K-love provides christians along with lost confused people the opportunity to hear Gospel music that ministers in a great way. If K-love goes off the air I would be devastated, and I am certain so would many others. I believe K-love gives the public a service that no other radio station does, and that is the connection with our Heavenly Father. If the FCC doesn't understand the impact it has on the millions of peoples lives I challenge the FCC to listen for a week and see if you aren't encouraged and strenghtend in God's love. I ask that the FCC carefully consider this letter and take into consideration all the positives K-love offers. I will continue to pray for this station and I am certain God will allow his word, and work to prevail. God Bless.
